

LIFE+ Information and Communication
Guidelines for applicants 2009

The current guidelines apply to the preparation of project proposals to be submitted to the European Commission under *LIFE+ Information and Communication*. They are intended to help the applicant prepare the project proposal and fill in the application forms.

1. Introduction to LIFE+

1.1 What is LIFE+?

LIFE+ is the European financial instrument for the environment, for the period from 1 January 2007 until 31 December 2013. The legal basis for LIFE+ is the **Regulation (EC) No 614/2007 of the European Parliament and of the Council of 23 May 2007**, published in the Official Journal of the European Union L149 of 9 June 2007.

LIFE+ covers both the operational expenditure of DG Environment and the co-financing of projects. According to Article 6 of the LIFE+ Regulation, at least 78 % of the LIFE+ budgetary resources must be used for project action grants (= LIFE+ projects).

During the period 2007-13, the European Commission will launch one call for LIFE+ project proposals per year. The amount available for co-financing projects under the 2009 LIFE+ call for proposals has been set at EUR 250.000.000. Under this third call (LIFE+ 2009), the deadline for beneficiaries to submit their proposals to the national authorities is the **15th September 2009**. National authorities must then forward all proposals to the European Commission to be received, at the latest, by the deadline of **22 October 2009, 17 h 00**.

These guidelines for applicants only apply to this third call for LIFE+ project proposals ("LIFE+ 2009").

LIFE+ is open to public or private bodies, actors or institutions registered in the European Union. Project proposals can either be submitted by a single beneficiary or by a partnership which includes a coordinating beneficiary and one or several associated beneficiaries. They can be either national or transnational, but the actions must exclusively take place within the territory of the 27 Member States of the European Union.

1.2 Priority actions and projects to be co-financed under LIFE+

LIFE+ aims at co-funding actions in the field of nature conservation (LIFE+ Nature and Biodiversity) as well as in other fields of the environment that are of European interest (LIFE+ Environment and Governance). A third component of LIFE+ aims specifically at co-funding information and communication activities for the environment (LIFE+ Information and Communication). More specifically, the following types of projects can be distinguished under LIFE+:

1. LIFE+ Nature and Biodiversity

- Best practice and/or demonstration projects contributing to the implementation of the objectives of the Birds and Habitats Directives (Council Directives 79/409 EEC and 92/43/EEC).
- Demonstration and/or innovation projects contributing to the implementation of the objectives of the Commission Communication COM (2006) 216 final: "*Halting the loss of Biodiversity by 2010 – and beyond*".

2. LIFE+ Environment Policy and Governance

- Demonstration and/or innovation projects related to any of the "*priority areas of action*" set out in the document "LIFE+ Environment Policy and Governance, Guidelines for applicants 2009".
- Projects contributing to the monitoring of the environmental status of forests within the European Union territory.

3. LIFE+ Information and Communication

- Communication and awareness raising campaigns related to the implementation, updating and development of European environmental policy and legislation set out in chapter 2 of the present guidelines.
- Awareness raising campaigns for the prevention of forest fires and training for forest fire agents.

Projects to be co-financed under the 2009 call for proposals can only take place within the territory of the European Union.

1.3 How, where and when to submit a proposal?

LIFE+ beneficiaries must submit their proposals to the competent national authority of the Member State in which the coordinating beneficiary is registered. **Annex 1** provides a list of the names and contact addresses of the national authorities for LIFE+ for the 27 Member States. The deadline for submitting the proposals to the national authorities is **15 September 2009**. Proof of submission by that date may be required by the Commission.

The national authorities will then forward the LIFE+ project proposals to the Commission, to be received before the deadline of **22 October 2009, 17 h 00**. The only address that national authorities shall use for submitting LIFE+ proposals to the European Commission is the contact address indicated in Annex 2. **Proposals sent directly by beneficiaries to the Commission will not be accepted.**

The proposal and all its obligatory annexes must be forwarded to the Commission on CD-ROM or DVD, in an electronic format. Project beneficiaries must use a separate CD-ROM/DVD for each individual LIFE+ project proposal. The full title of the proposal should be clearly labelled on the CD-ROM/DVD. The proposal itself must be submitted as **two "black and white only"** (with the exception of maps provided in form B2b in LIFE+ Nature and Biodiversity proposals) pdf documents and **one** Excel file, including all technical and financial forms. These three documents should be as follows:

- (1) A **1st pdf document** containing forms A1 to A7 (plus A8 for LIFE+ Nature and Biodiversity proposals and for LIFE+ Information and Communication proposals aiming at contributing to forest fire prevention). These forms should be scanned and submitted as a single pdf file of the original, printed, completed and signed (where applicable) size A4 paper forms. Applicants should ensure that the corresponding pdf file is of a readable quality (at a maximum resolution of 300 dpi - applicants must avoid sending files scanned at a higher resolution in order to keep file sizes manageable).
- (2) A **2nd pdf document** containing all other technical forms (i.e. B, C and D forms). These forms should be submitted as a single pdf document generated directly from the electronic file of the proposal application forms (i.e. converted, not scanned) in order to ensure a relatively small file size and better quality.
- (3) An **Excel file** containing the completed financial application forms.

The proposal must be printable on a black-and-white printer, and in an A4 format. Where proposal forms are signed, beneficiaries are strongly advised to check whether the signatures are still identifiable on a printout of the form. By way of exception, **maps** annexed to the proposal can be submitted as separate pdf documents that have been directly saved from their original format and should be clearly labelled as "maps" (filename). These annexed map files may be submitted in sizes A4 or A3, and may include colours.

In addition, mandatory financial annexes must be submitted, which vary depending on whether the coordinating beneficiary is a public body or not. These

documents must be submitted as a separate Excel file (in the case of the "Simplified financial statement") and as separate pdf files printable in A4 format (in the case of the profit and loss account and the balance sheet, the audit report or auditor-certified balance sheet and profit and loss account, and the public body declaration). Please see section 1.5 below for further details on the mandatory financial annexes.

Additional documents/annexes submitted by applicants (e.g. brochures, CVs, additional information etc) will not be uploaded or evaluated and therefore applicants must not include any such material in the CD-ROM/DVD.

Before submitting the proposals to the Commission, national authorities are strongly advised to check whether the CD-ROM/DVD can be opened and read, whether it contains all the required electronic files, and whether the application forms and files provided are correctly filled in and complete.

1.4 How will LIFE+ projects be selected?

The following description is a short summary of the evaluation procedure; further details are found in the "Guide for the evaluation of LIFE+ project proposals 2009".

The project proposals received by the deadline of **22 October 2009, 17 h 00** from the national LIFE+ authorities are registered by the Commission and an acknowledgement of receipt is transmitted to the coordinating beneficiary.

The LIFE Unit of the Environment Directorate General is responsible for the evaluation procedure. It will verify the admissibility, exclusion and eligibility, the selection and the award criteria and propose to the LIFE+ Committee a list of project proposals for co-financing, according to the criteria outlined in the evaluation guide.

During the **Admissibility, exclusion and eligibility phase**, the European Commission will check whether the proposals submitted are complete and have been submitted in the required format. In case the proposal is found to be incomplete¹, coordinating beneficiaries may be contacted directly by the Commission, via e-mail, and asked to submit missing information within a deadline of **5 working days**. **The e-mail address specified by the applicant as the contact person's e-mail address in form A2 will be used by the European Commission for this and all other subsequent contact with applicants (it should therefore correspond to an e-mail account which is valid, active and checked on a daily basis throughout the duration of the evaluation procedure)**. Only those proposals that are deemed complete and submitted within the requested format will be admitted to the following Selection phase.

During the **Selection phase**, the European Commission will check whether the proposals submitted comply with the general technical and financial selection criteria that are outlined in the evaluation guide. Only those proposals that are deemed to comply with the selection criteria will be admitted to the Award phase.

During the **Award phase**, a score will be given to each proposal on the basis of the following 6 award criteria applicable to all three branches of LIFE+ project funding:

1. Technical coherence and quality (max. 15 points, pass score 8 points)
2. Financial coherence and quality (max. 15 points, pass score 8 points)
3. Contribution to the general objectives of LIFE+ (max. 25 points, pass score 12 points)
4. European added value and complementarity and optimal use of the EC funding (max. 30 points, pass score 15 points)
5. Transnational character (max. 5 points, no pass score)
6. Compliance with national annual priorities and national added value according to the LIFE+ national authority (max. 10 points, no pass score)

On the basis of the final award scores given to each proposal, the European Commission will then set up a "long list" of proposals to be admitted to revision. This long list takes into account the quality of the proposals and will also take into account

¹ Please refer to the *Guide for the Evaluation of LIFE+ project proposals 2009* for more detailed information on the type of documents and/or missing information that may be requested from the coordinating beneficiary after the deadline of 22 October 2009

that (1) at least 50% of the LIFE+ project budget must be allocated to projects for nature and biodiversity, (2) projects should be distributed amongst EU Member states according to the indicative national allocations published in the *Guide for the Evaluation of LIFE+ proposals 2009* and (3) at least 15% of the LIFE+ should ideally be allocated to transnational projects.

During the **Revision phase**, the Commission will ask the coordinating beneficiaries on the above long list to revise their proposals in order to bring them fully into line with the technical and financial provisions of the LIFE+ Regulation, the Common Provisions applicable to LIFE+ projects and the LIFE+ guidelines for applicants. If necessary, this may entail a reduction of a proposal's budget, its EC financial contribution and/or its proposed EC co-financing rate, as well as the modification or elimination of certain actions and their costs.

On the basis of the results of the revision, the Commission then submits to the LIFE+ Committee for its opinion a "short list" of proposals to be co-financed, and a "reserve list" of proposals.

The LIFE+ Committee is made up of representatives of the 27 Member States and is chaired by the Commission. Should this Committee give a favourable opinion, and within the limits of the funds available, the Commission will then decide upon a list of projects to be co-financed. After approval by the European Parliament, individual grant agreements are sent to each successful coordinating beneficiary for signature.

On the basis of the expected timing as outlined in the LIFE+ Evaluation Guide 2009, the individual grant agreements are expected to be signed from **mid-July to late August 2010** at the very latest (for a detailed timetable, see **Annex 3**).

The earliest possible starting date for projects is **1 September 2010**.

1.5 Administrative and financial information to be provided

The LIFE+ Regulation states that applicants must be public or private bodies, actors or institutions registered in the EU. This application guide categorises such applicants into three types of beneficiaries: (1) *public bodies*², (2) *private commercial organisations*³ and (3) *private non-commercial organisations* (including NGOs)⁴.

The term "public bodies" is defined as referring to national public authorities, regardless of their form of organisation – central, regional or local structure – or the various bodies under their control, provided these operate on behalf of and under the responsibility of the national public authority concerned.

All coordinating beneficiaries that have declared themselves as being public bodies in their proposal (application form A2) must provide as a financial annex a declaration (the "Public body declaration") stating that the coordinating beneficiary is a public body, fully completed, with a dated signature.

All beneficiaries must show their legal status (by completing application forms A2 or A5) confirming that they are legally registered in the EU. In addition they must declare that they are not in any of the situations foreseen under Article 93(1) and 94 of the Financial Regulation (by signing the application form A3 or A4);

In addition all coordinating beneficiaries other than public bodies, that is to say the beneficiary types (2) and (3), must provide, as annexes to their proposal, evidence that they comply with the selection criterion set out in the Article 176⁵ of the Financial Regulation i.e. that:

"the applicant has stable and sufficient sources of funding to maintain his activity throughout the period during which the action is being carried out"

Therefore, all coordinating beneficiaries other than *public bodies* will have to provide the following administrative and financial documents as annexes to their LIFE+ proposal:

1. The most recent balance sheet and profit and loss account. This document must be annexed to the LIFE+ proposal as a scanned pdf file, printable in A4 paper format. Where the coordinating beneficiary does not yet have a balance sheet and profit and loss account, because the organisation has been only recently created, it must provide a management plan (for at least 12 months in the future) with the financial data prepared in accordance with the standard required under national legislation.
2. Where the EU contribution requested exceeds 300.000 €, the most recent balance sheet and profit and loss account must either have an *independent audit report* certifying that they present a true and fair view of the coordinating beneficiary's financial situation or a *certification by an independent auditor* that the accounts give a true and fair view of the coordinating beneficiary's financial situation. This document

² Including public institutions which for the further purposes of these Guides are considered as public bodies

³ Including similar commercial actors which for the further purposes of these Guides are considered as private commercial organisations

⁴ Including similar non-commercial actors which for the further purposes of these Guides are considered as private non-commercial organisations

⁵ Further details on how this criterion will be assessed are found in the *Guide for the Evaluation of LIFE+ project proposals 2009*.

must be annexed to the LIFE+ proposal as a scanned pdf file, printable in A4 paper format. In the case of a newly created organisation, the auditor's certificate provided is based on the management plan where the financial data are presented in accordance with relevant national provisions.

3. A "Simplified Financial Statement"; coordinating beneficiaries are requested to fill in the Excel table which is part of the application package. This document must be duly filled in and must be annexed to the LIFE+ proposal as an Excel file.

It should be noted that the above annexes will be required by the Commission irrespective of whether they are obligatory or not for the particular type of organisation, according to national legislation, in the coordinating beneficiary's Member State.

1.6 General recommendations for all LIFE+ beneficiaries

The current chapter replies to some frequently asked questions on how to conceive a project proposal, applicable to all three strands of LIFE+. Specific guidelines and recommendation on how to fill in the technical and financial forms for LIFE+ Information and Communication follow in subsequent chapters.

1.6.1. In which language may the proposal be submitted?

LIFE+ proposals may be submitted in any of the official EU languages, except Irish or Maltese. The Commission nevertheless recommends to fill in the technical part of the proposal also or only in English.

Form B1 ("Summary description of the project") must always be submitted in English. It may **in addition** also be submitted in the language of the proposal.

1.6.2. Who may submit a proposal?

A proposal may be submitted by any legal person registered in the European Union, i.e. (1) public bodies, (2) private commercial organisations and (3) private non-commercial organisations (including NGOs).

Any coordinating beneficiary that is not a public body must provide evidence with the proposal about its financial viability during the project period and its capacity to manage the amounts proposed in the proposal budget. Such beneficiaries will therefore have to provide with their proposals a number of additional documents (see **Chapter 5** for further details). Failure to provide these additional documents leads to an exclusion of the proposal.

1.6.3. Who may participate in a project?

Once a proposal has been accepted for co-funding, the coordinating beneficiary will become legally and financially responsible for the implementation of the project. The coordinating beneficiary will be the single point of contact for the Commission and will be the only beneficiary to report directly to the Commission on the project's technical and financial progress.

The coordinating beneficiary receives the Community financial contribution from the Commission and ensures its distribution as specified in the partnership agreements established with the associated beneficiaries (if there are any – see below). The coordinating beneficiary must be directly involved in the technical implementation of the project and in the dissemination of the project results.

The coordinating beneficiary must bear part of the project costs and must thus contribute financially to the project budget. It cannot therefore be reimbursed for 100% of the costs that it incurs. Furthermore it cannot act, in the context of the project, as a sub-contractor to one of its associated beneficiaries.

In addition to the coordinating beneficiary, a LIFE+ proposal may also involve one or more associated beneficiaries and/or one or more project co-financiers.

An **associated beneficiary** must be legally registered in the European Union. It shall always contribute technically to the proposal and hence be responsible for the implementation of one or several project actions. An associated beneficiary must also

contribute financially to the project. It cannot act, in the context of the project, as a sub-contractor to the coordinating beneficiary or to other associated beneficiaries. Furthermore it must provide the beneficiary with all the necessary documents required for the reporting to the Commission.

Projects involving partnerships between beneficiaries are only encouraged when this partnership brings an added value to the project. A meaningful collaboration can be expected for instance when the partnership strengthens the feasibility or the demonstration character of the proposal, its European added value and/or the transferability of its results and lessons learnt.

Overall, the experience of the previous LIFE programmes has shown that multi-beneficiary projects are more difficult to manage and involve higher technical and financial risks. It is therefore strongly advised to keep the number of associated beneficiaries in a proposal to the necessary minimum. *It is generally recommended not to involve more than 5 associated beneficiaries in a LIFE+ proposal. Should the proposal involve more, this should be explicitly justified.*

There is no obligation to involve associated beneficiaries in a LIFE+ proposal. A proposal that is submitted without any other participant other than the coordinating beneficiary itself is perfectly eligible. On the other hand, a beneficiary should not hesitate to associate other beneficiaries if this would bring an added value to the project.

A **project co-financier** only contributes to the project with financial resources, has no technical responsibilities and cannot benefit from the Community financial contribution. Furthermore it cannot act, in the context of the project, as a sub-contractor to any of the projects beneficiaries.

For specific tasks of a fixed duration, a proposal may also foresee the use of **subcontractors**. Subcontractors cannot act as beneficiaries or vice-versa. Subcontractors provide external services to the project beneficiaries who fully pay for the services provided. Sub-contractors should not be identified by name in the proposal and, even if they are, Article 8 of the Common Provisions still has to be respected (in particular paragraph 8.4 on the selection of sub-contractors).

For a more detailed description of the respective rules related to the coordinating beneficiary, associated beneficiaries, co-financiers and subcontractors, please refer to Articles 3 to 8 of the Common Provisions applicable to LIFE+ projects.

1.6.4. What is the optimal budget for a LIFE+ project?

There is no fixed minimum size for project budgets. Beneficiaries should however be aware that the European Commission favours the co-financing of large, ambitious LIFE+ proposals with a substantial budget. Historically, the average grant awarded has been in excess of 1 million €.

When preparing a project budget, beneficiaries should also take into account the maximum ceilings for the LIFE+ allocation per Member State: a project proposal from one single Member State that requests an EC financial contribution higher than the national allocation for that Member State may have a reduced probability of being selected for LIFE+ co-funding (for the national allocations see *Guide for the evaluation LIFE+ project proposals 2009*).

1.6.5. What is the maximum rate of Community co-financing under LIFE+?

The maximum Community co-financing rate for LIFE+ projects is 50% of the total eligible project costs.

By way of exception, a co-financing rate of up to 75% of the total eligible costs may be granted to *LIFE+ Nature* proposals that focus on concrete conservation actions for **priority** species or habitat types of the Birds and Habitats Directives.

1.6.6. How much should project beneficiaries contribute to the project budget?

The (coordinating) beneficiary and (if applicable) any associated beneficiaries are expected to provide a reasonable financial contribution to the project budget. A beneficiary's financial contribution is considered as a proof of its financial commitment to the implementation of the project objectives - a very low financial contribution may therefore be considered as an absence or lack of commitment.

A proposal will be automatically rejected in the project selection round if the financial contribution of any of the beneficiaries to the proposal budget is 0 €.

Moreover, where public bodies are involved as coordinating and/or associated beneficiaries in a project, the sum of their financial contributions to the project budget must exceed (by at least 2%) the sum of the salary costs of their staff charged to the project.

Finally, it is expected that all beneficiaries of a project receive a share of the EC financial contribution that is proportionate to the costs that they are expected to incur. Where the financial contribution of a beneficiary would be equal or superior to the costs that it would incur, this may indicate that the actions of this beneficiary would have been carried out anyway, even without LIFE+ co-financing. Such actions may therefore be deleted from the project during revision.

1.6.7. What is the optimal starting date and duration for a project?

When preparing the project's time planning, beneficiaries should be aware that the expected date of the signature of the grant agreements for the LIFE+ 2009 projects will be in mid-2010. Therefore, the earliest possible starting date for these projects is **1 September 2010**. Any costs incurred before that starting date will not be considered eligible and cannot be included in the project budget.

There is no pre-determined project duration for a LIFE+ project. Generally speaking, the project duration must correspond to what is necessary to complete all of the project's actions and to reach all its objectives. Most projects last for 2-5 years.

The experience of the previous LIFE programme has shown that many projects had difficulties completing all actions within the proposed project duration, mostly due to unforeseen delays and difficulties encountered during the project. Beneficiaries are therefore strongly advised to build an appropriate safety margin (e.g. 6 months) into the timetable of their proposal.

On the other hand, since only 3 payments to a project will be made at most (first pre-financing, mid-term pre-financing and final payment), very long projects may be hard to manage from a financial point of view. Beneficiaries should also be aware that a project that has completed all of its actions prior to the expected end date can submit its final report ahead of schedule and receive its final payment before the official project end date mentioned in the grant agreement.

1.6.8. Where can a LIFE+ proposal take place?

Proposals submitted under the 2009 call may only take place on the territory of the European Union Member States. Actions are not allowed to take place and costs are not allowed to be incurred outside the EU territory. The only exception to this rule may be related to a limited amount of travel and subsistence costs for the attendance of conferences, workshops or similar events, provided that these are useful to achieve the project objectives, and have been specifically foreseen in the proposal or have specifically been approved by the Commission.

Proposals aimed at implementing the objectives of specific European environmental legislation are only eligible for LIFE+ co-funding if they take place on the territory of the EU Member States where this specific legislation would be applicable. For that reason, LIFE+ Nature projects for implementing the objectives of the EU Birds and Habitats Directives are ineligible in the French overseas departments (DOMs).

1.6.9. Which project beneficiary should be in charge of the project management?

It is expected that the project management is carried out by the staff of the coordinating beneficiary. However on the basis of an appropriate justification it may be carried out by a subcontractor under its direct control. Any other arrangements for the project management would have to be adequately explained and justified. It is also strongly advised that each project has a full-time project manager.

While there is no obligation for the beneficiaries to include in the proposal budget any costs related to the project management, the proposal should nevertheless clearly describe who will be in charge of the project management, how much personnel and time will be devoted to this task and how and by whom decisions on the project will be made during the project period (i.e. how and by whom the project management will be controlled).

It is important to note that if an agency associated with the beneficiary carries out the technical and/or financial administration of the project, this body **MUST** be an associated beneficiary of the project in order for its costs to be eligible for co-financing.

1.6.10. To which extent are salary costs of public staff eligible for LIFE+ co-funding?

Article 5(5) of the LIFE+ Regulation states that civil servant's salary costs⁶ may be funded only to the extent that they relate to the cost of project implementation activities that relevant public body would not have carried out had the project concerned not been undertaken. The staff in question must be specifically seconded to a project and they must represent an additional cost with respect to existing permanent staff.

Accordingly, any staff expenditure of public body beneficiaries may only be considered as eligible costs of the project if the staff in question has been specifically seconded to the project, i.e. their contracts/personnel files must show that the individuals concerned have been working for x weeks/months on the project.

⁶ The definition of civil servant includes long term public employees from public bodies.

Moreover, the sum of the public bodies' contributions (as coordinating beneficiary and/or associated beneficiary) to the project budget must exceed (by at least 2%) the sum of the salary costs of their staff charged to the project. This will be checked at both the selection phase and at the time of the final payment.

The cost of temporary personnel specifically recruited for the duration of the project and exclusively dedicated to its implementation shall not be taken into account in the calculation of the minimum amount of the public bodies' contribution mentioned above, on condition that:

- (a) The contracts of such personnel do not begin before the date of signature of the grant agreement, nor finish after the end date of the project.
- (b) The contracts mention the LIFE+ project specifically.
- (c) The personnel concerned are employed exclusively for the implementation of tasks foreseen in the LIFE+ project.

1.6.11. Outsourcing of project activities

The beneficiaries should have the technical and financial capacity and competency to carry out the proposed project activities. It is therefore expected that the share of the project budget allocated to external assistance should remain below 35%. Higher shares may only be accepted if an adequate justification for this is provided in the project proposal.

If a beneficiary is a public body, any outsourcing (also including any outsourcing of the project management) must be awarded in accordance with the applicable rules on public tendering and in conformity with Community Directives on public tendering procedures.

For amounts exceeding 125.000 €, private beneficiaries shall invite competitive tenders from potential subcontractors and award the contract to the bid offering best value for money; in doing so they shall observe the principles of transparency and equal treatment and shall take care to avoid any conflicts of interest.

1.6.12. Under which conditions does LIFE+ favour transnational projects?

The LIFE+ Regulation indicates that, while selecting the projects to be co-funded, the Commission shall have special regard to transnational projects, when transnational cooperation is essential to guarantee environmental or nature protection. A transnational proposal should therefore be submitted only if the project proposal provides sufficient arguments for an added value of the transnational approach. If such evidence can be provided, the proposal will be considered for a higher scoring in the project selection process and will therefore have a higher chance of being selected for co-funding.

When preparing a transnational proposal, the beneficiaries must clearly determine the share of the project costs to be spent by them in each of the EU Member States.

1.6.13. How voluminous should a LIFE+ proposal be?

A proposal should be as concise and clear as possible. Avoid voluminous proposals and do not provide excessively detailed descriptions of project areas, environmental technologies, lists of species, etc. The technical application forms of a LIFE+

proposal (i.e. the LIFE+ application forms, part B and C) should normally not encompass more than 50 pages.

Clear and detailed descriptions should however be provided for all project actions. Maps should be annexed wherever this would be useful to clarify the location of the proposed actions. Any double listing of information between the technical and financial forms should be avoided. Financial information should primarily be given in the financial forms only.

Brochures, CVs and similar documents should not be submitted and will be ignored if provided.

1.6.14. Recurring activities are ineligible for LIFE+ funding

The LIFE+ Regulation (Article 3.2) does not allow the financing of recurring activities. A recurring action is understood in the context of this application guide as "any day to day operation".

For that reason, any recurring site surveillance, monitoring or management actions that were already carried out prior to the project and/or need to be continued after the end of the project (at the same level of intensity, using the same techniques and material...) should not be included in the LIFE+ proposal budget.

Under LIFE+ Nature, investments necessary to facilitate recurrent management may be fully eligible. In any such cases, however, the costs related to the use of this equipment remain, as above, ineligible as they concern recurrent activities (see the guidelines for applicants for LIFE+ Nature and Biodiversity for further details)

By way of exception, recurring actions with a clear demonstration value may be considered as eligible for funding. In such cases, the proposal must clearly justify and explain the demonstration character.

In addition, some flexibility in respect to recurring activities for projects developing and implementing Community objectives relating to broad based, harmonised, comprehensive and long-term monitoring of forests and environmental interactions, that avoid the financing of day to day operations, may be applied.

1.6.15. Complementarity with other EC funding instruments must be ensured

According to Article 9 of the LIFE+ Regulation, LIFE+ may not finance any "measures which fall within the eligibility criteria and main scope of, or receive assistance for the same purpose from, other Community financial instruments". These include, amongst others, the European Regional Development Fund, the European Social Fund, the Cohesion Fund, the European Agricultural Fund for Rural Development, the Competitiveness and Innovation Framework Programme, the European Fisheries Fund, the Civil Protection Financial Instrument and the seventh Research Framework Programme.

It is thus essential that, prior to submitting their proposal to the European Commission, beneficiaries check thoroughly that the actions proposed under their project **in practice cannot be and are not funded** through other European funds. Beneficiaries will be required to sign a declaration to this effect.

The beneficiaries must inform the European Commission about any related funding they have received from the Community budget, as well as any related ongoing applications for funding from the Community budget. The beneficiaries must also

check that they are not receiving operating grants from LIFE+ (or other Community programmes) with respect to the on-going operations.

In addition, at the project revision stage, the national authority may also be required to indicate the steps taken to ensure the coordination and complementarity of LIFE+ funding with other Community financial instruments.

1.6.16. Efforts for reducing the projects "carbon footprint"

All beneficiaries will be asked to explain how they intend to ensure that the "carbon footprint" of their project remains as low as is reasonably possible. Details of efforts to be made to reduce CO₂ emissions during a project's life shall be included in the description of the project. However, beneficiaries should be aware that expenses for offsetting greenhouse gas emissions will not be considered as eligible costs.

1.6.17. Role of national annual priorities

Article 6 of the LIFE+ Regulation allows Member States to submit national annual priorities – for 2009 several Member States have taken advantage of this possibility.

Proposals submitted to the Commission may receive an enhanced score during the evaluation process which may play a role in the proposal's success when the national indicative allocations are to be fulfilled. On the other hand, projects that do not meet a Member State's national annual priorities may also be selected on quality grounds alone.

National annual priorities can be viewed at the following web address:
<http://ec.europa.eu/environment/life/funding/lifeplus2009/call/index.htm#nap>

1.7 Personal Data Protection Clause

The personal data supplied with your proposal, notably the name, address and other contact information of the beneficiaries and co-financiers, will be placed in a database named ESAP that will be made available to the Community Institutions, as well as to a team of external evaluators who are bound by a confidentiality agreement. ESAP is used exclusively to manage the evaluation of LIFE+ proposals.

The same personal data of successful projects will be transferred to another database, BUTLER, which will be made available to the Community Institutions and to an external monitoring team who are bound by a confidentiality agreement. BUTLER is used exclusively to manage LIFE projects.

A summary of each project, including the name and contact information of the coordinating beneficiary, will be placed on the LIFE website and made available to the general public. At a certain point the coordinating beneficiary will be invited to check the accuracy of this summary.

The Commission, or its contractors, may also use the personal data of unsuccessful applicants for follow up actions in connection with future applications.

Throughout this process, Regulation (EC) n° 45/2001 of the European Parliament and of the Council of 18 December 2000 "on the protection of individuals with regard to the processing of personal data by the Community institutions and bodies and on the free movement of such data" will be respected by the Commission and its sub-contractors. You will notably have the right to access data concerning you in our possession and to request corrections.

Submission of a proposal implies that you accept that the personal data contained in your proposal is made available as described above. It will not be used in any other way or for any other purposes than those described above.

2. LIFE+ Information and Communication

2.1 What is *LIFE+ Information and Communication*?

*The LIFE+ Regulation*⁷

LIFE+ is the European Community financial instrument supporting the Community environmental policy for the period 2007 – 2013. LIFE+ consists of three components:

- (1) LIFE+ Nature & Biodiversity,
- (2) LIFE+ Environment Policy and Governance, and
- (3) LIFE+ Information and Communication.

These guidelines concern uniquely *LIFE+ Information and Communication*.

There are two types of LIFE+ Information and Communication projects:

1. LIFE+ Information & Communication projects aiming at **awareness raising campaigns and communication actions on environmental issues**. Such campaigns and actions should primarily be national or transnational, and should be linked to the implementation, updating and development of EU environmental policy and legislation related, for example, to nature and biodiversity, water, energy, waste, climate change, etc.

Under this heading, the EC encourages the submission of proposals for awareness raising campaigns and communication actions on nature protection and biodiversity matters, in order to support the implementation of the Commission's communication 'Halting the loss of biodiversity by 2010' and the attached Action Plan⁸.

The EC would also be interested to receive, amongst others, result-oriented proposals that would take the results of a significant number of previous LIFE projects in a given sector and actively transfer them to the key stakeholders of that sector that could usefully implement these results.

2. LIFE+ Information & Communication projects aiming at contributing to **forest fire prevention**⁹ within the EU. Special training for agents involved in forest fire prevention and awareness raising campaigns for populations affected by forest and woodland fires can therefore be considered for funding under this heading.

⁷ Regulation (EC) n° 614/2007 of the European Parliament and of the Council of 23 May 2007, published in the Official Journal of the European Union L149 of 9 June 2007

⁸ http://ec.europa.eu/environment/nature/biodiversity/comm2006/index_en.htm

⁹ When not covered by the Civil Protection Financial Instrument – Council Decision No 2007/162/EC, Euratom

2.2 General principles of LIFE+ Information and Communication funding

All actions financed under LIFE+ Information & Communication should have a European added value and should be complementary to those actions that can be financed under other Community funds during the period 2007-2013.

Furthermore, in order to be eligible for LIFE+ funding, projects must be highly visible and technically and financially sound.

Geographical scope

All the proposed actions must take place on the territory of the Member States.

What is the maximum allowed co-financing rate?

LIFE+ projects are co-financed by the Community at a maximum rate of 50% of eligible costs (article 5.2 of the LIFE+ Regulation).

Eligibility of costs

To be considered eligible, costs must comply with the provisions of Articles 25 and 26 of the Common Provisions.

Applicants should avoid presenting LIFE+ Information and Communication projects that include the following activities and related costs, as they are ineligible:

- Investments in major infrastructure and significant expenditure on durable goods;
- Land purchase or any other related costs;
- Research, development of knowledge base and technological development activities (studies, creation of complex databases etc.) that do not have a clear link with the project's objectives;
- Marketing activities for commercial products;
- Lobbying activities of NGOs;
- Information and dissemination actions and awareness raising campaigns related to EMAS and ECOLABEL registration procedures. These fall within the scope of the Competitiveness and Innovation Framework programme;
- Forest fire prevention actions covered by the Civil Protection Financial Instrument;
- Costs for the protection of intellectual property rights (e.g. patents).

Monitoring activities

Appropriate activities to measure the impact of the project both on the target audience and on the environmental problem targeted must be included in the project

proposal. Indicators and impacts must be monitored and evaluated throughout the duration of the project.

Technical capacity to implement the project

The project partnership composed of the coordinating beneficiary, the associated beneficiaries (if relevant) with the support of external assistance (if relevant) must demonstrate sufficient technical capacity to implement the project.

This includes both environmental capacity in terms of knowledge of the environmental problem identified and on the appropriate ways to solve it, and communication/training capacity in terms of appropriate experience in communication/training campaigns similar to those to be implemented in the project.

3. Conceiving a LIFE+ INF project proposal

Logical steps

Applicants should consider the following logical steps in order to conceive a project proposal:

1. Identify **the environmental problem** to be addressed by the project. The environmental problem must be well known by the beneficiaries at the application stage and must be clearly related to a specified EU environmental policy (e.g. nature protection and biodiversity, water, energy, waste, climate change etc.). Warning: "lack of awareness" does not constitute an environmental problem.

Example of an environmental problem to be addressed by a project: high mortality rate of the Golden Eagle due to poaching and illegal hunting.

2. Define **what is to be achieved** at the end of the project in terms of progress towards solving the environmental problem identified. The project's expected results have to be 'SMART' (Specific, Measurable, Achievable, Relevant and Timely). Warning: A simple carrying out of the communication campaign (conferences, distribution of communication material etc.) without achieving anything specific cannot be considered to constitute a positive result of the project.

Example of an objective to be achieved by a project: reduction of the mortality rate of the Golden eagle by 10% in 3 years in a specific area through awareness raising activities.

3. Define **who will be targeted** by the project and why this target audience is relevant for addressing the environmental problem identified. Warning: Communication campaigns targeting only the broad general public cannot, in most cases, be considered as effectively addressing a specific environmental problem.

Example of a target audience for a project: potential poachers, hunters, public authorities and rural population of a defined area.

4. Define the **actions** that will enable the objectives to be achieved. The actions must all be necessary and specific to both the identified problem and the target audience identified. The key messages should be refined to suit the different target audiences and their respective level of awareness of the issue.

Example of awareness raising actions in a project: organisation of targeted meetings and events, publication of brochures and leaflets for the target audience.

5. Define **indicators** that will enable to measure the impact of the project both on the target audience and on the environmental problem targeted. These indicators and impacts must be monitored and evaluated throughout the

duration of the project. The progress achieved is to be compared with the situation before the start of the project.).

Example of monitoring indicators for project: number of hunters reached, reduction of cases of poaching and illegal hunting in the defined area, improved sensitisation of the target audience to the environmental problem as measured by polls etc.

Example of a project: the EU awareness-raising campaign on climate change

What is the campaign trying to achieve?

- Improve awareness and understanding of climate change amongst citizens.
- Demonstrate that daily activities can collectively make a big difference and that each individual has a role to play in the fight against climate change.
- Motivate citizens to undertake these small, significant changes to their daily routine.

Who should I target in order to achieve these objectives?

This campaign is one step in a longer, continuous awareness-raising process. As a first step, the campaign primarily targets those citizens who only sometimes make an effort for the environment. By convincing them that their individual efforts make a difference, a significant shift of people from this group to the group of people who often make an effort is expected. They then become ambassadors for the campaign as their behaviour influences others.

The aim is to show that simple everyday actions lead collectively to significant reductions in greenhouse gas emissions.

What do I know about my target audience and their values?

Surveys confirm that winning the battle against climate change is important to Europe's citizens. In fact, climate change is among the top three concerns of European citizens regarding the environment. At the same time, many people tend to feel helpless in the face of this challenge, they think that it is the duty of others - industry, politicians, etc. - to combat climate change, or they think that their actions do not have any impact.

What messages / tools / products will I use to achieve my objectives?

The main message of the campaign is that simple daily choices, like turning up the air conditioning or leaving a light switched on, have a direct impact on climate change. This message is translated into a specific slogan. The supporting line on a poster - "Turn Down. Switch Off. Recycle. Walk" - directs people to the many things they can easily do to reduce their carbon emissions. This message gives people a sense of both empowerment and responsibility.

At the launch of the campaign, giant campaign banners on public buildings will be unveiled in most EU capitals, and statues in the capitals will wear campaign T-shirts. The campaign also uses TV, outdoor and newspaper advertising and a range of electronic tools, such as e-mailings, to attract attention. Comprehensive information is available on the campaign web site.

How to structure a project proposal?

The following main categories of eligible actions may be distinguished in the project proposal:

- A. Project management and monitoring of project progress (obligatory)
- B. Preparatory actions (if needed)
- C. Awareness raising campaigns (obligatory)
- D. Training activities with respect to forest fire prevention (if relevant)
- E. Monitoring of the project impact on the main target audience and on the environmental problem targeted (obligatory)
- F. Communication and dissemination of the project and its results (obligatory for all LIFE+ projects).

Each project actions should be classified under one of the above categories.

It is strongly recommended that, if possible, the project includes **up to 10 actions**, in addition to the A actions and F actions. Please do not indicate sub-actions.

For Information and Communication proposals targeting biodiversity and nature issues, applicants are strongly advised to consult the document "[Scoping study for an EU-wide communications campaign on biodiversity and nature](#)"¹⁰ which contains useful information and ideas on how to maximise the impact of this type of campaign.

A. Project management and monitoring of project progress (obligatory)

Project management:

Every project proposal must contain the description of appropriate project management, covering the management of the project's technical, financial and administrative aspects.

Project management shall ensure that the project is run in compliance with the LIFE+ obligations (Grant Agreement, LIFE+ Regulation and Common Provisions), in line with the revised project proposal. These obligations include reporting to the Commission according to art. 12 of the Common Provisions and according to the timetable indicated in the revised proposal (form C3).

¹⁰ http://ec.europa.eu/environment/pubs/pdf/biodiversity/biodiversity_scoping_study.pdf

According to art. 4.1 of the Common Provisions, the coordinating beneficiary is solely legally and financially responsible to the Commission for the full implementation of the project. Project management may however be partially or fully delegated by the coordinating beneficiary to an associated beneficiary or be partially outsourced. In any case, the coordinating beneficiary must retain a full and day to day control of the project.

The project management structure must be clearly presented in the project proposal and should be supported by a self-explanatory organigramme. This organigramme should show the distribution of responsibilities within the project management team and show how management decisions are taken. This chart must provide evidence that the coordinating beneficiary (Project Manager) has a clear authority and an efficient control of the project management staff, even if part of the project management would be outsourced.

It is strongly recommended that the project management staff has previous experience in project management and that the Project Coordinator or Project Manager be full-time. If a Project Coordinator or Manager also directly contributes to the implementation of certain actions, an appropriate part of his/her salary costs should be attributed to the estimated costs of those actions.

The project management shall ensure proper consultation or involvement of the main stakeholders (see Form B4), for example, by involving them in a Project Steering Committee who would meet on a regular basis during the project.

Training, workshops and meetings for the improvement of beneficiaries' management skills may be included, where these are required for the achievement of the project objectives.

The participation in and the organisation of networking activities (for example, with other LIFE projects) of the project may also be included.

Monitoring of project progress:

In order to ensure that the project is implemented according to the revised project proposal (scope of the actions, timetable etc.), the project management must set up appropriate procedures to measure the progress of the different project actions and the project as a whole. Progress must be measured by the management on a regular basis. This may involve regular meetings with action coordinators, the use of progress indicators etc.

Monitoring of project progress should be clearly distinguished from the monitoring of the project *impact* on the main target audience and on the environmental problem targeted (E actions).

External audit:

Where required, an independent auditor nominated by the coordinating beneficiary must verify the financial statements provided to the Commission in the final project report. This audit should not only verify the respect of national legislation and accounting rules but should also certify that all costs incurred respect the LIFE+ Common Provisions. In the financial forms, the costs for the audit should be under the budget item "External assistance". (ref. art. 31 of the Common Provisions).

After-LIFE Communication plan:

The coordinating beneficiary must produce an "After-LIFE Communication Plan" as a separate chapter of the final report. It shall be presented in the project's language and

(optionally) in English, in paper and electronic format. It shall set out how you plan to continue communicating on the environmental issues addressed by your project after the end of the project. A new and separate action must be added to the proposal for this plan (this action must be a zero cost action) and the plan must also be added to the list of deliverables.

B. Preparatory actions (if needed)

In general, and amongst others, preparatory actions should:

- be directly related and necessary for the implementation of the awareness raising or training activities of the project,
- be of limited duration (i.e. should be significantly shorter than the project duration).

Preparatory actions would typically include: preparatory studies, consultation of stakeholders, application for authorisations and permits etc.

As a general principle, preparatory actions must produce practical recommendations and/or information which are necessary and will be directly used by the project. The preparatory actions do not aim at completely preparing the project.

Research activities may not be included.

C. Awareness raising campaigns (obligatory)

The actions included in this section should constitute the actual implementation of the information or awareness raising campaign on environmental issues or on forest fire prevention.

Communication or awareness raising activities must specifically address the environmental problem identified (see Form B2). This involves addressing a specific problem related to topics such as nature and biodiversity, water, energy, waste, climate change, forest fire etc.

It must be ensured that awareness raising campaigns only disseminate information that is fully in line with EU environmental policy.

The proposed actions must to be clearly related to the project's objective. They must primarily target the main target audience (see Form B4), which has a direct relation with or is directly responsible for the environmental problem. Subsequently, activities may also move to a larger public.

Such actions would cover, for instance:

- the organisation of awareness raising events for the target audience, such as conferences, seminars, exhibitions, demonstrative actions, forums for exchange of experiences etc.,
- the publishing of communication material for distribution to the target audience during the project. For example: brochures describing the environmental problem and how to address it, leaflets, posters, newsletters, stickers etc.,
- advertising campaigns in the media,
- the production of films or videos for demonstration to the target audience during the project,
- on-line communication activities on the project's website,
- etc.

The Commission encourages the implementation of result-oriented *innovative* approaches in the awareness raising campaigns.

For projects falling in the policy area 'national or transnational communication or awareness raising campaigns related to nature protection or biodiversity matters', proposed awareness raising actions should support the implementation of the Commission's communication 'Halting the loss of biodiversity by 2010' and the attached Action Plan.

Project actions must lead to a measurable change of attitude in the daily life of the target audience and the public, to an improved implementation of European policy and legislation at national, regional and local level, and to an increased exchange of knowledge and best practices amongst stakeholders.

The project must therefore:

- achieve a high visibility with the main targeted audience of the environmental issue targeted by the project,
- provide guidance to all concerned target audiences on how they can individually (or collectively) take concrete actions to address the environmental issue in question, thus ensuring sustainability of the project's activities,
- identify potential partners, provide them with the relevant information and turn them into multipliers of the awareness raising activities beyond the LIFE+ project.

In necessary, the implementation of an awareness raising campaign may be partially outsourced.

When implementing the campaign, the beneficiaries shall always clearly display the LIFE logo and mention the Community support.

D. Training activities with respect to forest fire prevention (if relevant)

Training measures are only eligible in the particular case of a project related to the **prevention of forest fires**. This includes the training of forest fire agents in order to improve their capacity to prevent forest fires. The proposed actions must be clearly related to the forest fire prevention problem identified and the project's objective. The typology of the proposed training should be described in details.

The project should not include activities aiming at improving the operating conditions during forest fire assistance interventions, the improvement of the command chain or addressing the issue of public preparedness in the case of forest fire emergencies. (ref. Civil Protection Financial Instrument).

When implementing these actions, the beneficiaries shall always clearly display the LIFE logo and mention the Community support.

E. Monitoring of the project impact on the main target audience and on the environmental problem targeted (obligatory)

The awareness raising, communication and training actions (C and D actions) must lead to a measurable change of attitude in the daily life of the target audiences, to an improved implementation of European policy and legislation at national, regional and local level, and to an increased exchange of knowledge and best practices amongst stakeholders.

In this view, every project proposal must contain an appropriate amount of monitoring activities in order to measure the concrete *impact* of the awareness raising or training activities on the main target audiences and on the environmental issue targeted.

These activities are distinct of the monitoring of the project progress (A actions).

For this purpose, the project management should identify specific indicators to be used to measure the impact of the project. These indicators should be coherent with the environmental problem addressed and the type of activities planned during the project. The initial situation from which the project starts should be assessed, and progress should be regularly evaluated against it.

The monitoring of the project impact on the main target audience should allow the project management either to confirm the adequacy of the developed means to address the specific problem, or to question these means and alternatively develop new ones. At the end of the project, the beneficiaries should be able to quantify the progress achieved, both in terms of impact on the main target audience and in terms of environmental improvement.

It should be noted that, in specific cases, the environmental impact of a Communication and Information project may be difficult to measure (e. g. when the environmental problem addressed is climate change or biodiversity loss). In such cases, the project should at the very least attempt to assess the change in the attitude of the target audience, describing a clear methodology and indicators.

F. Communication and dissemination of the project and its results (obligatory for all LIFE+ projects)

All LIFE+ projects are obliged to publicise the project and its results (art. 13.1 of the Common Provisions). Such activities include both obligatory and non obligatory communication and dissemination actions. These actions should be clearly separate from the project's core awareness raising campaigns addressing an environmental issue (actions C).

Obligatory actions:

- **Project website (see art. 13.4 of the Common Provisions):**
The coordinating beneficiary shall create a project website or use an existing website for the dissemination of project activities, progress and results. This website shall be online at the latest six months after the start of the project, shall be regularly updated and shall be kept for at least five years after the end of the project.
- **LIFE+ information boards (see art. 13.5 of the Common Provisions):**
The coordinating beneficiary and associated beneficiaries shall erect and maintain notice boards describing the project at locations where it is implemented, at strategic places accessible and visible to the public. The LIFE logo shall appear on them at all times.
- **Layman's report:**
This report shall be submitted with the project's Final Report and should be included on the project's website. The layman's report shall be presented in English and in the project's language. It is aimed at a broader target group and serves to inform decision-makers and a non-technical audience on the objectives and the results achieved by the project. This report shall be 5-10 pages long and present the project, its objectives, its actions and its results to a general public.

Non obligatory actions:

This may include, for example:

- Media work (press articles, TV spots etc.),
- Workshops, seminars, conferences relating to the project's activities and results,
- Production of brochures, booklets, films, etc. relating the project's activities and results
- Etc.

4. Technical application forms

The technical part of the *LIFE+ Information and Communication* application file consists of 3 parts (A, B and C) available for download as a single Word file.

Important note

All forms are mandatory and must be fully completed, except:

- the associated beneficiary declaration (form A4) and profile (form A5) if there are no associated beneficiaries,
- the co-financier profile (form A6) if there are no co-financiers,
- the declaration of support from the competent national central authority (form A8), which is mandatory only for projects in the field of forest fire prevention.

Where forms are not obligatory or where you have no specific information to put on certain parts of obligatory forms, you are strongly advised to indicate "not applicable" or "none" or "no relevant information" or an equivalent indication.

Part A – administrative information

Form A1

Project title (max 120 characters): It should include the key elements and objective of the project, such as the name of the site and/or the name of the main species/habitat type or biodiversity issue targeted. Note that the Commission may ask you to change the title in order to make it clearer.

Expected start date: The earliest possible start date is the 1st September 2010. Please use the following format for all dates: DD/MM/YYYY.

Policy area: You can only choose one policy area – tick as appropriate.

Form A2

Short Name: The coordinating beneficiary should be identifiable throughout the technical proposal forms by its short name (max 25 characters).

Beneficiary number: The beneficiaries should be identifiable in the financial proposal forms FC and F1 – F7 by their beneficiary number. For the coordinating beneficiary, the beneficiary number is always 1, for the first associated beneficiary it is 2, etc.

Legal Name: The legal name is the name under which the coordinating beneficiary is officially registered (if applicable).

Legal Status: Select one of the following 3 choices: *Public body*, *Private commercial* or *Private non-commercial* (including NGOs). Indicate an "X" in the appropriate box. Further guidance on how to distinguish private organisations from public bodies can be found in section 5 of chapter 1 of the present guidelines.

Value Added Tax (VAT) number: If applicable, provide the organisation's VAT number in the VAT register.

Legal Registration Number: If applicable, provide the organisation's legal national registration number or code from the appropriate trade register (e.g. the Chamber of Commerce register), business register or other.

Country Code: Use the relevant country code as indicated at:

http://ec.europa.eu/eurostat/ramon/nuts/codelist_en.cfm?list=nuts

Title: Title commonly used in correspondence with the person in charge of proposal co-ordination. Example: Mr., Mrs., Ir., Dr., Prof.

Function: Provide the function of the person in charge of coordinating the proposal. Example: Managing Director, Financial Director, Sales Manager, Project Manager, etc.

Department/Service Name: Name of the department and/or service in the organisation, co-ordinating the proposal and for which the contact person is working. The address details given in the fields which follow must be for the department / service and not the legal address of the organisation.

Year: Provide the year for which the figures in this section are provided, e.g. '2006'. Information from the most recent accounting year should be provided.

Annual turnover: To be provided by all coordinating beneficiaries **other than "public bodies"** for which this type of information is available. If not applicable, please indicate **"N.A."**. Information from the most recent accounting year should be used. The figures should be given for the organisation as a whole and not just for the department carrying out the work. They must be expressed in Euros.

Annual Balance Sheet Total: (i.e. total of assets or total of liabilities): To be provided by **all non-public** coordinating beneficiaries for which this information is available. If not applicable, please write **"N.A."**. The figures should be given for the legal entity as a whole and not just for the department carrying out the work. Information from the most recent accounting year should be used. They must be expressed in Euros.

Number of employees: The figures should be for the legal organisation as a whole - not only for the department carrying out the work. The contribution of part-time staff should be accounted as the equivalent number of full-time staff (full-time equivalents).

Brief description of the activities of the coordinating beneficiary and experience in the area of the proposal: Please describe the beneficiary organisation, its legal status, its activities and its competence to coordinate and carry out the proposed project. The beneficiary should demonstrate that it has the technical capability to implement the project. This means in practice that it has the required experience or knowledge on the specific environmental issue addressed by the project (e.g. nature and biodiversity, water, energy, waste, climate change etc.) and in communication (if that is not the case then this experience or knowledge should exist in the project partnership). The description given should enable the Commission to evaluate the technical reliability of the coordinating beneficiary, i.e. whether it has the necessary experience and expertise for a successful implementation of the project.

For private non-commercial organisations, please provide the key elements that prove that the organisation is recognised as such.

Form A3

Before completing this form, please check that the coordinating beneficiary does not fall into any of the situations listed in articles 93.1 and 94 of the Financial Regulation (EC) 1605/2002, reference: <http://europa.eu/scadplus/leg/en/lvb/l34015.htm>

3. Financial contribution of the coordinating beneficiary, actions in which it will participate: Amount to be provided in Euro (€). The amount indicated here must be identical with the amount indicated as coordinating beneficiary contribution in the financial forms **FA** and **FC**. This amount must be greater than 0€ and cannot include any funding specifically obtained for the project from other public or private sources (this is co-financing). List all the actions in the implementation of which the coordinating beneficiary will participate and indicate the total cost (in euros) of the coordinating beneficiary's part (this must be coherent with the costs indicated in forms C and in the financial form FB).

Signature: The form **must be signed** and the signature **must** be dated. The **name** and **status** of the person signing the form must be clearly indicated.

Form A4

If the project foresees associated beneficiaries, this form becomes compulsory. Complete one form per associated beneficiary (A4/1, A4/2, A4/3, etc.).

Before completing this form, please check that the associated beneficiary does not fall into any of the situations listed in articles 93.1 and 94 of the Financial Regulation (EC) 1605/2002, reference: <http://europa.eu/scadplus/leg/en/lvb/l34015.htm>

2. Financial contribution of the associated beneficiary, actions in which it will participate: Amount to be provided in Euro (€). The amount indicated here must be identical with the amount indicated as corresponding associated beneficiary contribution in the financial form **FC**. It must be greater than 0€ and cannot include any funding specifically obtained for the project from other public or private sources (this is co-financing). List all the actions in the implementation of which the associated beneficiary will participate and indicate the total cost (in euros) of the associated beneficiary's part (this must be coherent with the costs indicated in forms C and in the financial form FB).

Signature: The form **must be signed** and the signature **must** be dated. The **name** and **status** of the person signing the form must be clearly indicated.

Form A5

If the project foresees associated beneficiaries, this form becomes compulsory. Complete one form per associated beneficiary (A5/1, A5/2, A5/3, etc). **See instructions for form A2.**

Form A6

Complete one form A6 per co-financier (A6/1, A6/2, A6/3, etc.).

We will contribute the following...": Provide this amount in Euro (€). Remember that the amount(s) indicated here must be consistent with the amount(s) indicated as co-financier's contribution(s) in the financial forms FA and FC.

Status of the financial commitment: please indicate either "*Confirmed*" or "*To be confirmed*" (only applicable if funding is conditional on project selection).

Signature: The form **must be signed** and the signature **must** be dated. The **name** and **status** of the person signing the form must be clearly indicated.

Important note: If a coordinating/associated beneficiary also co-finances the project, it should only appear in the proposal with that single role of coordinating/associated beneficiary (with an indication in form A3/A4 of its overall financial contribution), and not also as a co-financer.

Form A7

Applicants frequently underestimate the importance of this form. Clear and complete answers must be provided to each question. LIFE+ projects **may not include** actions that fall within the main scope of other Community financial instruments (see "Complementarity with other EC funding instruments" in the section on general principles). **Applicants must therefore verify this aspect carefully** (please note point 1 of the declaration in form A3 that you have to sign), explain how this was verified and provide the fullest possible information in their answers.

National authorities may be asked to review this declaration.

Form A8 (for projects aiming at contributing to forest fire prevention ONLY):

Before submitting their proposal to the Commission, applicants for projects aiming at contributing to forest fire prevention are requested to inform their competent forest fire national central authority in order to ensure consistency between actions financed at Community level and national forest fire prevention policies. Form A8 pertains to this requirement and is obligatory.

Signature: The form **must be signed** and the signature **must** be dated. The **name** and **status** of the person signing the form must be clearly indicated.

Part B – Project objectives and expected results

Form B1 – Summary description of the project (to be completed in English)

Please provide a Summary Description of your project. The description should be structured, concise and clear. It should include:

- **Project title:** see instructions on form A1.
- **Project objectives:** Provide a detailed list of all the objectives of your project by decreasing order of importance. These objectives must be realistic (be achievable within the timeframe of the project with the proposed budget and means) and clear (without ambiguity).
- **Key messages to be passed on to the project's target audiences:** Please indicate (preferably in bullet points) the main messages that you intent to communicate to the project's main audience during the planned awareness

raising and communication campaign. Please ensure that these messages are fully in line with the EU legislation and policy. Examples of such messages could be 'communicate/explain the requirements of the EU 'Birds' and 'Habitats' directives', 'communicate/explain best practices in terms of waste recycling in order to comply with the EU directive.../policy....' etc.

- **Actions and means involved:** Please explain clearly what means will be utilised during the project to reach the objectives indicated above (financial means should not be indicated). Please ensure that there is a clear link between the proposed actions and means and the project's objectives. List the main project actions by order of their starting date and summarise for each what exactly will be done, how this will be done, where and by whom.
- **Expected results (quantified as far as possible):** Please list (preferably in bullet points) the main results and outputs expected at the end of the project. The expected results must be concrete, realistic and **quantified** as far as possible. Since the project's final achievements will be judged against its expected results, please make sure that the expected results are well defined and well quantified. Expected results should not be the project's objectives, but they should be *outputs* and quantified *achievements* allowing it to reach the objectives.

Form B2

Environmental problem:

Please provide a clear description of the environmental, nature protection or biodiversity conservation problems targeted by your proposal. Explain why you consider that this problem is related to European environmental policy and legislation. Please note that "lack of awareness" or "lack of information" cannot be considered to constitute an environmental problem. Please describe the state of this environmental problem, at the application submission date.

If applicable, please address the forest fire fighting issue here.

Preparatory work undertaken already:

Describe any previous preparatory work already undertaken *directly* in preparation for the project implementation. Such work may include preparatory studies or other preliminary work or surveys.

Partnership technical capacity:

Describe how the proposed partnership (composed of the coordinating beneficiary and the associated beneficiaries if relevant, with the support of external assistance) has the sufficient technical capacity to implement the project.

The partnership must have the relevant **environmental** capacity/experience in terms of knowledge of the specific environmental problem addressed by the project (e.g. nature and biodiversity, water, energy, waste, climate change, etc.) and of the ways to solve it. The partnership must also have the relevant **communication/training** capacity/experience to implement the proposed awareness raising/training activities.

You may illustrate your statements with examples of successfully implemented projects in the field of environment and communication.

Form B3

EU added value of the project and its actions:

- Please describe how the proposed project actions are expected to contribute to the achievement of environmental objectives of EU importance (including, if relevant, the impact on matters relating to forest fire fighting).
- You should indicate how the solution proposed by your project to address the environmental problem may be relevant and/or transferable to other locations in the EU.
- You should also provide here a clear description of the geographical scope of the project. A **transnational approach** and/or a **multinational partnership** may, if well justified here, be considered as EU added value. As regards forest fire prevention activities, a transnational approach is encouraged.

Efforts for reducing the project's carbon footprint

Explain how you intend to ensure that the "carbon footprint" of your project remains as low as is reasonably possible. Any details of efforts to be made to reduce CO₂ emissions during a project's life shall be included here. Generally, this would mainly concern reduction of the project's carbon footprint during project management activities (reduction of travel, use of recycled paper etc.).

Form B4

Stakeholders involved and main target audience of the project:

Please ensure a clear distinction between stakeholders and main target audience.

"**Stakeholders**" refers to entities (organisations, authorities, persons, groups of persons etc.) that have an interest in the issue targeted by the project. Project participants are inherently stakeholders and do not have to be listed in this section. Proper stakeholder consultation should be ensured during the project.

The "**Main target audience**" represents the audience (population, organisations, other bodies) the project activities are targeting. This audience must be precisely defined (both qualitatively and quantitatively) in the proposal and must be directly concerned by or be responsible for the environmental issue addressed by the project. Project monitoring activities must include the measurement of the impact of the project's activities on this target audience. The selection of the target audience must be justified, in view of reaching the project's objectives. Provide quantitative and qualitative information, wherever possible.

Form B5

Expected constraints and risks:

It is important that project applicants identify all possible **external events** ("constraints and risks") that could have **major negative impacts** on the successful implementation of the project. Please list such constraints and risks, in decreasing order of importance, indicating one main constraint or risk per paragraph. Please also indicate any possible constraints and risks due to the **socio-economic environment**. For each constraint and risk identified, please indicate how you

envisage overcoming it. Please ensure that the list is coherent with the "constraints and assumptions" indicated in form C1.

Please detail also how you have taken into account the risks identified into the planning of the project (time planning, budget, etc.) and the definition of the actions.

Form B6

Continuation and valorisation of the project results after the end of the project:

Describe how the project will be continued after the end of the LIFE+ funding, what actions are required to consolidate the results in order to ensure the sustainability of the project results. Please indicate what mechanisms will be put in place to ensure that this will be done. Please note that information provided in this section is indicative and will have to be updated during the project life.

In particular, please reply to the following questions:

- **Which actions will have to be carried out or continued after the end of the project?** Please list such project actions indicating their reference (e.g. A1, A2...) and title.
- **How will this be achieved, what resources will be necessary to carry out these actions?** Please indicate how the above actions will be continued after the project, by whom, within what timeframe and using with what financing.

Part C – Detailed technical description of the proposed actions

Form C1 – Details of the proposed actions

It is strongly recommended that, if possible, the project includes **no more than 10 actions** (in addition to the A and F actions). Please do not indicate sub-actions.

Please use the LIFE+ INF standard forms and classify each of the project actions in one of the below categories:

A. Project management and monitoring of project progress (obligatory)

- A1. Project management
(Include a management organigram)
- A2. Monitoring of project progress
- A3. External audit
- A4. After-LIFE Communication plan.

B. Preparatory actions (if needed)

- B1.....
- B2.....

...

C. Awareness raising campaigns (obligatory)

C1.....

C2.....

.....

D. Training activities with respect to forest fire prevention (if relevant)

D1.....

D2.....

.....

E. Monitoring of the project impact on the main target audience and on the environmental problem targeted (obligatory)

E1.....

.....

F. Communication and dissemination of the project and its results (obligatory).

Obligatory activities:

F1. Project website

F2. LIFE+ information boards

F3. Layman's report.

Non obligatory activities:

F4.....

F5.....

For each proposed action, please provide all the information as requested on the standard LIFE+ INF form:

Description (what, how, where and when):

Describe in details the content of the action. There must be a clear link between the action and the project's objective. Indicate what will be done, how, where and when.

Methods employed.

Constraints and assumptions:

Indicate what may prevent you from implementing the action as planned and what will be done to address this risk. Please ensure that these constraints and assumptions are in line with those indicated on Form B5.

Beneficiary responsible for implementation:

Please indicate which of the project's beneficiaries will be in charge of the implementation of each action. Should more than one beneficiary be implicated, please give full details of which beneficiary is responsible for what.

Expected results:

Please indicate (preferably in bullet points) the quantified/measurable results/outputs from the action. Please indicate whether they will be used in other actions and how.

Indicators of progress:

Please indicate how progress of this action will be measured.

Form C2 – Deliverable products and milestones of the project, and activity reports foreseen

Please make a clear distinction between deliverables and milestones.

Deliverable products are all those **tangible** products that can be shipped (e.g. management plans, studies and other documents, software, videos, etc). Please list all deliverable products chronologically according to their deadline for completion (day/month/year). For each deliverable, please include the code of the associated action. Please note that any deliverable product will have to be **submitted as a separate document** (bearing the LIFE logo) to the Commission together with an activity report.

Project milestones are defined as **key moments** during the implementation of the project e.g. "Nomination of the Project Manager", "Completion of a major conference", etc. Milestones (or corresponding documents) do not need to be submitted to the Commission. Please list all project milestones chronologically according to their deadline for delivery/achievement (day/month/year). In a report, you would need to inform the Commission whether the milestone has been completed or not.

Activity reports foreseen: The coordinating beneficiary shall report to the Commission about the technical and financial progress of the project. The project's achieved results and possible problems should be highlighted in these reports. The first report is the "Inception Report", which shall also provide a self-assessment of the viability of the project. If the project lasts more than 24 months and requests a Community contribution in excess of €300.000, and if the coordinating beneficiary intends to ask for a mid-term payment, a more detailed "Mid-term report with payment request" has to be provided. One "Final Report with payment request" shall be submitted, not later than 3 months after the project end date. Additional "Progress reports" should also be foreseen in order to ensure that at least one report is received every 18 months (the reporting schedule may be modified during the revision phase). Please consult the Common Provisions, Article 12 for full details on the reporting obligations of the LIFE+ projects. Please do not include activity reports as deliverables.

Form C3 - Timetable

In the table, please list all actions ordered by number and using their numbers and names. Please use the same number and title of action as presented in the project proposal (e.g. A1, A2...etc.). For each project action, please tick the action's implementation period. Please ensure that the timetable is presented **on one page only**. You may use the 'landscape' page setup format as necessary.

When planning the implementation period of your project, please bear in mind that a LIFE+ 2009 project cannot start before 1 September 2010. Also, please add an appropriate safety margin at the end of the project, to allow for the inevitable unforeseen delays.

Part D – Output indicator forms

Introduction

All applicants are required to define output indicators in their proposal. For this purpose, applicants should follow the instructions provided below and complete the relevant tables with the monitoring indicators that apply to their proposal. The monitoring indicator tables (in the form of an Excel file) are available on the LIFE+ website as part of the application package.

Article 15 of the Regulation (CE) n. 614/2007 foresees an evaluation of the implementation of the LIFE+ programme through a regular monitoring. This evaluation will concur to assess *"the contribution, both specifically and in general, that actions and projects financed under this Regulation have made to the implementation, updating and development of Community environmental policy and legislation and the use made of the appropriations"*.

In order to make this evaluation possible, the European Commission will regularly gather information and statistical data from the LIFE+ projects.

These information and data will essentially enable the evaluation of the concrete effects of the programme after its implementation in the fields of "Nature & Biodiversity", "Environment Policy & Governance" and "Information & Communication".

The information gathered from the beneficiaries in the framework of the monitoring of the LIFE+ programme with the help of the output indicator forms will be used exclusively for statistical purposes.

The Commission, in a different exercise, will evaluate the success of a project and the eligibility of its costs through the reports the beneficiary will provide and through the visits of the Commission staff and of the external team.

General guidance for completing the tables (forms D1-D4)

In order to be able to evaluate the contribution of the LIFE+ projects to the implementation of the programme, it is essential for the Commission to define both the initial situation (i.e. at

the beginning of a LIFE+ project) and the situation after its implementation (i.e. after the end of a project).

Thus, the present tables will include information which should be compiled at the beginning of a LIFE+ project.

At the end of a project, the beneficiary will receive similar tables, which will be compiled with data describing the actual results of the measures implemented and enable a comparison with the initial situation.

Only the electronic version of the tables provided by the Commission should be used and the layout of these tables must remain unchanged (i.e. do not add lines or columns or modify the format).

Beneficiaries should fill in only the tables foreseen for the component of the programme corresponding to their project ("Nature", "Biodiversity", "Environment Policy & Governance" and "Information & Communication").

The tables for awareness-raising and communication are identical for all the components and should be completed by every beneficiary.

Beneficiaries should fill in only the items which are relevant to their project. For example, if a LIFE+ Nature project does not include any land purchase, the corresponding cell in the table should be left void.

Instructions for completing the tables for LIFE+ Information & Communication (forms D1-D4)

Part 1 – Preparatory actions

Table 1
OUTPUTS
Types of preparatory actions planned

For every preparatory action, where applicable, indicate the number of measures you intend to implement during the project and the total budgeted cost.

Example: Your project foresees the preparation of three plans of project measures (i.e. plans for three different awareness-raising campaigns), ex ante and ex post monitoring of your measures and one permit procedure.

The total budgeted cost for these preparatory actions is 100.000 €.

Part 2 – Concrete actions

Table 2
OUTPUTS
Awareness-raising campaigns

Fill in the table with the number of campaigns, divided into the proposed categories of attendance, the expected number of persons and, possibly, of companies to be involved and the budgeted cost for every type of campaign.

Example: Your project includes ten awareness-raising campaigns for the general public and you expect you will inform at least 10.000 persons. These campaigns will cost 200.000 €. Furthermore, you plan one campaign especially targeted for private companies and you hope to involve at least 3 companies with a total of 100 managers. The budget for this campaign is 20.000 €

Table 3
OUTPUTS

Forest fire training activities

Indicate the number of training sessions you plan to implement during your project, the number of persons to be trained and the total budgeted cost.

Please note that all training sessions, both preparatory and linked to the implementation of concrete measures, must be included in the table.

Example: During your project, you intend to implement 10 training sessions. The expected number of fireman to be involved is 200 and the budgeted cost is 100.000 €.

Part 3 – Awareness-raising and communication (same form for all LIFE+ components)

Table 4
OUTPUTS

Workshops, seminars and conferences

Indicate, for every type of action, the number of attendants expected, divided in the suggested categories (Local/Regional, National, EU/International and General public, specialised, very specialized) and the total budgeted cost.

Example: You plan to organise 3 local information meetings to which you expect an attendance of 250 citizens, which you would describe as 'General public', one national seminar aimed at the awareness-raising of institutional staff (expected 100 persons), which could be defined as 'Specialized', and one international scientific congress, in which you would like to gather 50 university experts ('Very specialized'). The total budgeted cost is 50.000 €.

Table 5
OUTPUTS

Media and other communication and dissemination work (dissemination of the project's results)

Here you should indicate the number of articles, broadcasts, films etc. you expect as a result from your communication work in the frame of your project, together with the total budgeted cost for these actions. This concerns the communication of the project's results, and not the communication campaigns that are the main activities of a project. You should also indicate the average number of visitors per month you expect to your web-site during the lifetime of your project.

Example: Your project includes the production of one documentary and you expect that the national TV will broadcast it at least once during the project lifetime. Furthermore, you evaluate that your communication work through press releases will bring about at least ten national press articles. At the same time, you expect at least 300 visitors/month to your project web-site. These actions will cost 30.000 €.

Table 6
OUTPUTS

Publications

Here you should indicate the number of different publications (No. published) and the number of copies of each type of publication (No. of copies) you expect to produce during the lifetime of your project. Furthermore, fill in the language of each type of publication and the total budgeted cost.

Example: Your project includes the publication of two manuals and one scientific book, together with one poster to be distributed in local schools and two different kinds of leaflet to be mailed to the local population and distributed during a few events. The planned actions will cost 50.000 €.

Table 7

OUTPUTS

Educational activities

Fill in the table with your forecast of the number of students to be involved in your educational actions, divided into different levels of school (kindergarten and primary school, secondary school, higher education). Indicate the total budgeted cost for these actions.

Example: You plan to present your project to 250 students from a local secondary school. The total budgeted cost is 10.000 €.

Note: should applicants require further guidance for completing the D forms, more detailed specific guidelines, with examples of filled-in tables, are available for consultation on the LIFE website, under the section Toolkit\Project management tools\Monitoring indicators.

5. Financial application forms

The financial part of the *LIFE+ Information and Communication* application file consists of 10 forms (FA, FB, FC, F1, F2, F3, F4, F5, F6 and F7). It is available for download as an Excel file.

Important: *The project's budget must include only costs which are in accordance with Article 25 of the Common Provisions.*

The coordinating beneficiary and associated beneficiaries, as well as other companies which are part of the same groups or holdings, cannot act as sub-contractors.

Internal invoicing (i.e. costs which result from transactions between departments of a beneficiary) is not allowed, unless it is possible to prove that such transactions represent the best value for money and exclude all elements of profit, VAT and overheads.

The Community contribution will be calculated on the basis of eligible costs.

Cover page:

Please fill in the acronym of your proposal as stated in the technical forms.

Form FA - Budget breakdown and project funding

This form is filled in automatically, based on the data provided in the other forms in this section, with the exception of the cost of overheads. **Please do not modify any other cell.**

The form summarises the financial structure of the project, by providing a budget breakdown for the project and an overview of the financing plan.

Overheads are eligible at a flat rate of up to 7% of total eligible direct costs excluding land purchase (and the overheads themselves, which are indirect costs). The cell background will become red if the value entered exceeds this threshold. Applicants benefiting from an operating grant are not entitled to claim overheads.

Form FB – Cost breakdown for actions

For every action described in the technical forms C1, a detailed breakdown of costs should be provided on this form. Please use the same numbers and names for the actions as in forms **C1**.

This form is very useful in order to link technical outputs and costs. Particular attention should be given to the coherence of the presented costs with the costs included in forms F1-F7.

Depending on the number of actions, rows may have to be added on this table. Information should be consistent with the contents of the technical forms.

Form FC – Project funding breakdown

This form describes the funding of the project by the beneficiaries and/or co-financier(s), as well as the EC contribution requested per beneficiary.

Goods or services which are to be provided “**in kind**”, i.e. for which there is no cash-flow foreseen, are ineligible for EC co-financing and should not be included in the project's budget.

Beneficiary country: Select the country code of the beneficiary from the drop-down list.

Beneficiary N°: Please use the number given in the Beneficiary profiles in the *LIFE+* technical forms **A2** and **A5**.

Beneficiaries' short name: As in the *LIFE+* technical forms **A2** and **A5**.

Total costs of the actions in € Indicate the total costs of the actions undertaken by the beneficiaries as in the *LIFE+* technical forms **A3** and **A4**.

Coordinating beneficiary contribution: specify the amount of financial contribution provided by the coordinating beneficiary. This amount cannot include any funding obtained from other public or private sources specifically earmarked for the project or for a part of it (which should be declared as other co-financing). The amount indicated here should be the same as in the *LIFE+* technical form **A3**.

Associated beneficiary contribution: Indicate the financial contribution from each associated beneficiary, as in the *LIFE+* technical form **A4**. These amounts cannot include any funding obtained from other public or private sources specifically earmarked for the project or for a part of it (which should be declared as other co-financing).

Amount of EC contribution requested: Specify the amount of financial Community contribution requested by the coordinating beneficiary and each of the associated beneficiaries. This amount must be in accordance with the Articles 24 and 25.2 of the Common Provisions.

Co-financier's name: As in the Co-Financier profile and commitment forms **A6**.

Amount of co-financing in € Indicate the financial contribution of each co-financier as in the Co-Financier profile and commitment forms **A6**.

General remarks on the forms F1 – F7

All costs must be rounded to the nearest Euro and must exclude recoverable value-added tax (VAT) when the beneficiary can recover this cost from its national authorities.

Form F1 – Direct personnel costs

General: Article 5(5) of the Regulation states that civil servant's salary costs¹¹ may be funded only to the extent that they relate to the cost of project implementation activities that relevant the public body would not have carried out had the project concerned not been undertaken. The staff in question must be specifically seconded

¹¹ The definition of civil servant includes permanent employees from public bodies.

to a project (i.e. their contracts/personnel files must show that the individuals concerned have been working for x weeks/months on the project).

Moreover, the sum of the public bodies' contributions (as coordinating beneficiary and/or associated beneficiary) to the project budget must exceed (by at least 2%) the sum of the salary costs of their staff charged to the project. This will be checked during both the selection phase and at the time of the final payment.

The cost of temporary personnel specifically recruited for the duration of the project and exclusively dedicated to its implementation shall not be taken into account in the calculation of the minimum amount of the public bodies' contribution mentioned above, on condition that:

- (a) The contracts of such personnel do not begin before the date of signature of the grant agreement, nor finish after the end date of the project.
- (b) The contracts mention the LIFE+ project specifically.
- (c) The personnel concerned are employed exclusively for the implementation of tasks foreseen in the LIFE+ project.

Beneficiary N°: Please use the number given in the Coordinating beneficiary and Associated beneficiary profiles in the *LIFE+* technical forms **A2** and **A5**.

Action N°: Please insert the number(s) of the action(s) in which each member of personnel will be involved.

Type of contract: Indicate the exact legal denomination of the type of contract, civil servant / permanent contract / temporary contract / service contract / etc. **and** whether it is part time or full time. Indicating both details is absolutely necessary. (Ex. Temporary contract/Full time)

Note that service contracts with individuals may be charged to this category on condition that the individual concerned works in the beneficiary's premises and under its supervision and provided that such practice complies with the relevant national tax and social legislation.

Important: The time which each employee spends working on the project shall be recorded on a timely basis (i.e. every day, every week) using time sheets or an equivalent time registration system established and certified regularly by each of the project beneficiaries.

Category/Role in the project: You should identify each professional category in a clear and unambiguous manner to enable the Commission to monitor the labour resources allocated to the project. When the professional category is not explanatory of the role that the person will play in the project, you should also include this information.. *Examples of staff categories/roles in the project are: senior engineer/project manager; technician/data analysis, administrative/financial management etc.*

Daily rate: The daily rate charged for each member of personnel is calculated on the basis of gross salary or wages plus obligatory social charges, any other statutory cost but excluding any other costs. For the purpose of establishing the budget proposal, the salary may be calculated based on indicative average rates which are reasonable to the concerned category of personnel, sector, country, type of organisation, etc. Please take predictable salary increases into account when estimating the average

daily rates for the project duration. Please note that any daily rate over 400€ should be justified.

When reporting the costs, however, only actual incurred costs based on actual salaries, obligatory social charges and any other statutory cost can be used (estimations or payments based on the rates indicated in the proposal cannot be accepted).

The total number of person-days per year should be calculated on the basis of the total working hours/days according to national legislation, collective agreements, employment contracts, etc. An example for determining the total productive days per year could be as follows (provided what is established in the appropriate legislation):

Days/year	365 days
Less 52 weekends	104 days
Less annual holidays	21 days
Less statutory holidays	15 days
Less illness/other (when relevant)	10 days
= Total productive days	<u>215 days</u>

Number of person-days: The number of person-days needed to carry out the project.

Number of person-months: Is obtained by dividing the total number of person-days by the number of productive days per month. It should be rounded to the first decimal place.

Direct personnel costs: calculated automatically by multiplying the total number of person-days for a given category by the daily rate for that category.

% of Total personnel costs for project: Calculated automatically

Form F2 – Travel and subsistence costs

Note: Under this budget category applicants should foresee the travel costs for 2 people from the project to attend a regional kick-off meeting with EC representatives.

General: Only costs for travel and subsistence must be included here. Costs related to the attendance of conferences, such as conference fees, should be reported under other costs. The cost of participation in a conference is only considered eligible if the project is presented at the conference. The number of participants in conferences is limited to those for whose attendance there is a valid technical justification.

Beneficiary N°: Please use the number given in the Coordinating beneficiary and Associated beneficiary profiles in the *LIFE+* technical forms **A2** and **A5**.

Action N°: Please insert the number(s) of the action(s) to which each cost is related.

Destination (From / To): Identify the origin and destination of the trips. Specify the country and city name, if already known. If applicable, for repetitive visits to the project area, write 'project area'.

Outside Europe: Indicate 'Yes' for travel outside the European Union.

Purpose of travel: The purpose of travel must be clearly described, in order to allow an assessment of the costs in relation to the objectives of the project (examples: 'dissemination event', 'technical co-ordination meeting', 'project area visit'). Identify the number of trips foreseen and the number of people who will be travelling as well as the duration of the travel in days.

You may use more than one line for the purpose of travel or destination if necessary, but costs may be presented grouped, e.g. for all technical co-ordination meetings. However, the individual costs must be discriminated when reporting.

Travel costs: Travel costs shall be charged in accordance with the internal rules of the beneficiary. Beneficiaries shall endeavour to travel in the most economical and environmentally friendly way – video conferencing must be considered as an alternative.

In absence of internal rules governing the reimbursement the use of an organisation's own cars (in opposition to private cars) costs related to the use these are to be estimated at 0.22 € / km. If only costs for fuel are foreseen, they should also be listed here.

Subsistence costs: Subsistence costs shall be charged in accordance with the internal rules of the beneficiary (daily allowances or direct payment of meals, hotel costs, local transportation etc.). Make sure that meals related to travel/meetings of the beneficiaries are not included if subsistence costs are already budgeted as per diem allowances.

Form F3 – External assistance costs

General: External assistance costs refer to sub-contracting costs: i.e. services/works carried out by external companies or persons, as well as to renting of equipment or infrastructure. They are limited to 35% of the total budget unless a higher level can be justified in the proposal.

For example, the creation of a logo, establishment of a dissemination plan, design of dissemination products, translation services, publication of a book or renting of material should be included in external assistance. However, transportation of materials, printing of dissemination materials and others, even if done by an external company, should be reported under other costs.

Please note that any services supplied under subcontract, but which are **related to prototype** should be budgeted under prototype and not under external assistance. Costs related to the **purchase or leasing** (as opposed to renting) **of equipment and infrastructure** supplied under subcontract should be budgeted under those cost categories and not under external assistance.

Costs for the **lease of land use rights** must be charged under "external assistance" only if it concerns a **short-term** lease that expires prior to the project end date. Longer-term leases must be declared under land purchase.

Auditor costs related to the auditing of the project's financial reports should always be placed under this budget category. These costs will always be incurred solely by the coordinating beneficiary.

Beneficiary N°: Please use the number given in the Coordinating beneficiary and Associated beneficiary profiles in the *LIFE+* technical forms **A2** and **A5**.

Action N°: Please insert the number(s) of the action(s) to which each cost is related.

Procedure: Specify the procedure foreseen to sub-contract the work, e.g. 'public tender', 'direct treaty', 'framework contract', etc. Subcontracts must be awarded in accordance with Article 8.4 of the Common Provisions.

Description: Provide a clear description of the subject of the service that will be subcontracted, e.g. 'carrying out impact assessment', 'maintenance of ...', 'renting of ...', 'consultancy on ...', 'web page development', 'intra-muros assistance', 'organisation of dissemination event', etc. You may use more than one line for the description of the subcontract if necessary.

General comments on Forms F4.a, F4.b and F4.c - Durable goods

In the sub-categories equipment and infrastructure, you need to indicate the actual cost as well as the value of depreciation, in accordance with Article 25 of the Common Provisions. Only the depreciation is an eligible cost for the project and the EC co-financing will be calculated on the basis of this amount.

Important: Depreciation of durable goods already owned by beneficiaries at the start of the project is not eligible for LIFE+ funding.

Actual cost: Full cost of the infrastructure or equipment without applying any depreciation.

Depreciation: Total value of the depreciation in the accounts of the beneficiaries at the end of the project. For the purpose of establishing the budget proposal, the beneficiaries should estimate as precisely as possible the amount of depreciation for each item, from the date of entry into the accounts (if relevant) until the end of the project. This estimation is based on their internal accounting rules and/or in accordance with national accounting rules. This amount represents the eligible cost.

Please note that depreciation is limited to a maximum of 25% of the actual cost for infrastructure and a maximum of 50% of the actual cost for equipment.

Exception 1: For prototypes, the eligible costs are equal to real costs under the conditions set up in Article 25.7 of the Common Provisions.

Exception 2: for LIFE+ Nature projects (but not for Biodiversity projects), the cost of durable goods purchased by beneficiaries which are public bodies or private non-commercial organisations shall be considered eligible at 100%, if the organisation complies with all conditions set under Article 25.9 of the Common Provisions. In this case, the depreciation amount indicated should be the same as the actual cost.

Form F4.a – Infrastructure costs

Beneficiary N°: Please use the number given in the Coordinating beneficiary and Associated beneficiary profiles in the *LIFE+* technical forms **A2** and **A5**.

Action N°: Please insert the number(s) of the action(s) to which each cost is related.

Procedure: Specify the procedure foreseen to sub-contract the work, e.g. ‘public tender’, ‘direct treaty’, ‘framework contract’, etc. Subcontracts must be awarded in accordance with Article 8.4 of the Common Provisions.

Description: Give a clear description and breakdown of the infrastructure per cost item, e.g. ‘supporting steel construction’, ‘foundation of installation’, ‘fencing’ etc.

Important: *All the costs related to infrastructure, even if the work is carried out under sub-contract with an external entity, should be reported under this heading.*

Investments in large-scale infrastructure are considered ineligible.

Form F4.b – Equipment costs

Beneficiary N°: Please use the number given in the Coordinating beneficiary and Associated beneficiary profiles in the *LIFE+* technical forms **A2** and **A5**.

Action N°: Please insert the number(s) of the action(s) to which each cost is related.

Procedure: Specify the procedure foreseen to sub-contract the work, e.g. ‘public tender’, ‘direct treaty’, ‘framework contract’, etc. Subcontracts must be awarded in accordance with Article 8.4 of the Common Provisions.

Description: Provide a clear description of each item, e.g. ‘laptop computer’, ‘database software (off-the-shelf or developed under sub-contract)’, ‘measurement equipment’, ‘mowing machine’, etc.

Form F4.c – Prototype costs

Prototype costs are only eligible for Life+ Environmental Policy and Governance and LIFE+ Biodiversity projects.

A prototype is an infrastructure and/or equipment specifically created for the implementation of the project and that has never been commercialised and/or is not available as a serial product. It may not be used for commercial purposes during the life of the project and for five years after the project ends. See article 25.7 of the Common Provisions.

Durable goods acquired under the project can only be accepted in this cost category when they are essential to the innovative or demonstration aspects of the project. See Article 25.7 of the Common Provisions for definition of prototype.

Beneficiary N°: Please use the number given in the Coordinating Beneficiary and Associated Beneficiary profiles in the *LIFE+* technical forms **A2** and **A5**.

Action N°: Please insert the number(s) of the action(s) to which each cost is related.

Procedure: Specify the procedure foreseen to sub-contract the work, e.g. ‘public tender’, ‘direct treaty’, ‘framework contract’, etc. Subcontracts must be awarded in accordance with Article 8.4 of the Common Provisions.

Description: Give a clear description of the prototype.

Important: *All the costs related to the prototype, even if the work is carried out under sub-contract with an external entity, should be reported under this heading.*

Form F5 – Costs for land purchase or long-term lease of land/use rights

Costs for land purchase or long-term lease of lands/use rights are only eligible for Life+ Nature projects.

General: Please consult Article 35.1 of the Common Provisions, for the rules concerning land purchase. If short-term lease would be appropriate for achieving the project objectives, those costs should be presented under external assistance.

Beneficiary N°: Please use the number given in the Coordinating Beneficiary and Associated Beneficiary profiles in the *LIFE+* technical forms **A2** and **A5**.

Action N°: Please insert the number(s) of the action(s) to which each cost is related.

Description of land purchase / long term lease / one-off compensation: Give a clear description of each item, e.g. “purchase of acidic grasslands on sub-site X”, “one-off compensation for peat exploitation rights on sub-site Y”, etc. Use different rows for different land uses/habitat types/sub-sites, if their prices diverge significantly.

Estimated Cost per hectare: Estimated cost, excluding taxes and other charges, rounded to the nearest €.

Your proposal has to include a letter from the competent authority or from a registered notary confirming that the price per hectare is not above the average for the types of land and locations concerned.

Form F6 – Costs for consumables

General: Consumables declared on this form must relate to the purchase, manufacture, repair or use of items which are not placed in the inventory of durable goods of the beneficiaries (such as materials for experiments, animal feeding stocks, materials for dissemination, repair of durable goods given that this is not capitalised and that they are purchased for the project or used 100% for the project etc.). Should the project include a significant dissemination activity in which substantial mailing, photocopying, or other communication forms are used, the corresponding costs may also be declared here. However, **general consumables/supplies** (as opposed to direct costs), such as telephone, communication costs, photocopies, etc. are covered by the overheads category.

Catering costs/meals/coffees related to dissemination activities, such as presentations of the project, workshops or conferences should be reported here. However, please note that if the whole organisation of the conference is subcontracted, the corresponding cost should all be budgeted under external assistance.

They must also be specifically related to the implementation of project actions (**general consumables/supplies**, such as office material, water, gas etc. are covered by the overheads category).

Beneficiary N°: Please use the number given in the Coordinating beneficiary and Associated beneficiary profiles in the *LIFE+* technical forms **A2** and **A5**.

Action N°: Please insert the number(s) of the action(s) to which each cost is related.

Procedure: Specify the procedure foreseen to sub-contract the work, e.g. ‘public tender’, ‘direct treaty’, ‘framework contract’, etc. Subcontracts must be awarded in accordance with Article 8.4 of the Common Provisions.

Description: Provide a clear description of the type of consumable materials, linking it to the technical implementation of the project, e.g. 'raw materials for experiments action 2', 'stationery for dissemination products (deliverable 5)', etc.

Form F7 – Other costs

General: Direct costs which do not fall in any other cost category should be placed here. Costs for bank charges, conference fees, , insurance costs when these costs originate solely from the project implementation), etc. should be placed here. The **bank guarantee shall always be reported in this category**. A bank guarantee covering the first pre-financing payment might be necessary. Please refer to Articles 25.1, 25.12 and 28.2 of the Common Provisions and to the evaluation guide for more information

Beneficiary N°: Please use the number given in the Coordinating beneficiary and Associated beneficiary profiles in the *LIFE+* technical forms **A2** and **A5**.

Action N°: Please insert the number(s) of the action(s) to which each cost is related.

Procedure: Specify the procedure foreseen to sub-contract the work, e.g. 'public tender', 'direct treaty', 'framework contract', etc. Subcontracts must be awarded in accordance with Article 8.4 of the Common Provisions.

Description: Give a clear description of each item, linking it to the technical implementation of the project.

6. Admissibility checklist

A project may be declared inadmissible for one or more of the following reasons:

1. Forms are partly or completely hand-written

2. Non-standard forms have been used

This refers to modifications of the format and content of the forms presented in this application file.

3. Obligatory forms or signatures are missing

Forms A1, A2, A3, A7, A8 (for forest fire prevention projects only), B1, B2, B3, B4, B5, B6, C1, C2, C3, D1, D2, D3, D4, FA, FB, FC, F1, F2, F3, F4 a, b and c, F5, F6 and F7 are mandatory for all projects.

If the project involves associated beneficiaries, forms A4 (associated beneficiary declaration) and A5 (associated beneficiary profile) are obligatory for each associated beneficiary.

If the project involves co-financiers (other than the European Commission), a form A6 (co-financier profile and commitment) is obligatory for each co-financier.

All mandatory signatures should be present.

NB Where technical application forms are not obligatory or where you have no specific information to put on certain parts of obligatory forms, you are advised to indicate "not applicable" or "none" or "no relevant information" or an equivalent indication.

4. The coordinating beneficiary is a private body, but has not submitted the obligatory balance sheet and profit and loss account and, where relevant, an audit report or auditor-certified balance sheet and profit and loss account.

5. The coordinating beneficiary is a public body, but has not submitted the obligatory public body declaration.

6. The coordinating beneficiary or any of the associated beneficiaries is not established in the European Union.

7. The project proposal was submitted to the European Commission after the deadline.

Inadmissible proposals will not be assessed any further and will be rejected.

ANNEX 2: Contact address of the European Commission

All LIFE+ project proposals must be submitted via the national competent authorities.

The national competent authorities must use the following address to submit the proposals to the European Commission:

LIFE+ 2009 call for proposals Avenue du Bourget, n° 1 (BU-9 2/1) B - 1140 Brussels BELGIUM
--

ANNEX 3: Calendar of the LIFE+ 2009 evaluation and selection procedure

Date or period	Activity
15/09/2009	Deadline for applicants to send proposals to Member State authorities
22/10/2009	Deadline for the Member States to forward proposals to the European Commission
October 2009 to April 2010	Admissibility, exclusion and eligibility, evaluation and revision of the proposals
July-August 2010	Signature of individual grant agreements
01/09/2010	Earliest possible starting date for the 2009 projects

ANNEX 4: Important links

a) *General documents for all applicants:*

- [Regulation 614/2007 of the European Parliament and the Council of 23/05/2007 \(LIFE+\)](#)
