

Technical drawing of a road cross-section. The road width is 6.350m. The structure consists of an asphalt road surface (cca 5cm), a concrete road base (12cm), and a 1cm insulation layer. Below the road is a 1.5m concrete base. The road is flanked by concrete curbs (HÁJEK 4.75"). The drawing shows the road profile, drainage system, and elevations. Key elevations include 161.140, 160.560, 160.150, 159.720, 158.690, and 157.190. Slopes are indicated as 0.5%, 2.0%, and 5.0%. Dimensions for the road structure and surrounding terrain are provided.

Technical cross-section drawing of a road pavement structure. The drawing shows a vertical profile with various layers and dimensions. Key components include a metal railing (OCELOVÉ ZÁBRADLIE) with a height of 1.1m, a concrete curb (ŽB RÍMSA), a stone curb (KAMENNÝ OBRUBNÍK 75), and a drainage channel (REFABRIKOVANÝ CHODNÍKOVÝ PANEL). The pavement layers consist of asphalt (ASFALTOVÁ VOZOVKA cca 5cm), concrete (BETÓNOVÁ VOZOVKA 12cm), insulation (IZOLÁCIA 1cm), and bedding (SPÁDOVÝ BETÓN 1-5cm). The base is a subgrade (HÁJK 590 (HÁJEK 495)). Dimensions include a total width of 3175mm, a curb height of 150mm, a curb width of 525mm, a railing height of 100mm, a curb width of 60mm, a curb height of 350mm, a curb width of 200mm, a curb height of 300mm, a curb width of 125mm, a curb height of 1000mm, a curb width of 20mm, a curb height of 1000mm, a curb width of 20mm, and a curb height of 1000mm.
